

THINK WEINIG

After downloading the app for free from iTunes or Google Play Store, customers can register it with WEINIG. This allows the customer to see his entire WEINIG machine fleet at the tap of a finger. Another tap on the phone and he can be taken straight to his requested contact partner. It is just as easy to access the "Machine Monitor", where customers can see extensive information about the readiness for operation of their machinery. This means wood working professionals can always be in the picture, even when they are out of the factory. Besides an overview of current daily performance, the customer can also see maintenance information and stay informed by SMS or e-mail.

Always there for you: the WEINIG Group Service

Service at the WEINIG Group means far more than a few telephone numbers. Behind these are people who want to share their enthusiasm for wood processing with others. We will be pleased to help you!

Just scan the QR-Code and download the WEINIG App Suite free of charge:

The new WEINIG Service App offers a number of intelligent functions and has developed these further. For the WEINIG customer, the suite of functions also offers the benefit that he is perfectly connected to the WEINIG world and all of its services.

The digital future
in your hands

Think WEINIG
means

W4.0 digital

5 reasons to make you a winner with the WEINIG App

PRODUCTION OVERVIEW

Anytime and anywhere

- Display of current machine status at home and on the way
- Trend analysis, daily and weekly views

ORDER OVERVIEW

Your customers' orders always in view

- Order details and progress
- Order history to orders produced

OPTIMAL MAINTENANCE

Best possible availability

- **NEW:** Spindle Monitoring: for monitoring the spindle temperature and alarm in case of exceeding the limit value
- Sensor analysis reduces standstill times and prevents damages
- Maximal service life of spare parts and a fast reaction time reduces the production costs

WEINIG Cloud
Digital Intelligence

PRODUCTION ANALYSIS

Don't give your machine a break

- Reduction of production costs by optimizing the idle and set-up times

Requirements

GENERAL

- Registration via the WEINIG Service App
- A hardware firewall to assure a safe VPN connection
- 6 months free of charge

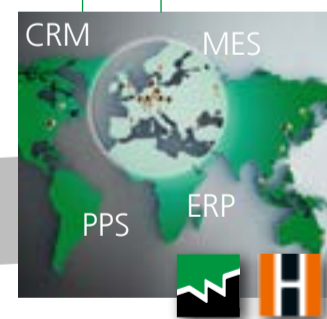

MACHINE SPECIFIC

- Possibly software update to latest version
- On older machines an additional hardware adaptation might be necessary

STANDSTILL NOTIFICATION

Your machine is sending an automated message, if jobless.

- Immediate and temporarily defined message about machine shut down via SMS or e-mail

You will find many additional functions in our App Suite.

- Smart tools for your daily work
- "With one tap of your finger you can reach the WEINIG service" – the fast contact to your WEINIG Service.
